

Miasmatic Characteristics

Psora – “The Representative Miasm Par Excellence” “A Groove, a fault”	Sycosis – Suppression of Gonorrhoea	Syphilis – Suppression of Syphilis
<ul style="list-style-type: none"> • Under functioning, introverted, incapable, shyness, blushing • Deficiency, lack, too little, slow, waiting, delayed, lack of energy, fear of poverty • Anxiety, fear, insecurity, worry, ailments from fear; desires safe, solid, long-lasting things • Preparing, saving things, possessive • Family oriented, caring for others, hard-working, wants to make a good impression • All is not lost, but everything is just so difficult • Sadness, grief; irritable; poor memory, mentally confused • Thinks of death, ponders death philosophically; does not tend to be suicidal • Worse in open air. Worse for cold air or changes in weather. Coldness • Worse in the morning/daytime. Better for rest and lying down. Movement agg. • Clear or white/bland discharges • Dentition problems, eruptions, itching, dryness, coldness, sourness, drowsiness. • Functional disturbances, weakness, assimilation issues. 	<ul style="list-style-type: none"> • Over functioning, extraverted, liveliness, expressiveness, high energy, strength and endurance. Tendency to overdo. • Strong polarities. • Sentimental, sensual, given to excess, exuberance, ostentatious, loves celebrations/parties. Erratic, impulsive, jealous. • Fast, impatient, out-going, acceleration. • Brilliant, flamboyant; abundant thoughts and fantasies. Obsessive. Boastful. • Hiding, covering up, suspicious, forgetful. Dread and open fear; guilt. Worse when thinking of symptoms. • Sudden onset, rapid progression. • Bland green/yellow discharge, excessive secretions, enlargements, fishy or musty smell, genital/urinary troubles, • Intense cravings and desires. Sour, spice, salt, ice; strong tastes. • Worse with excess heat/cold, damp. • Extremes of appetite; faster metabolism. • Worse in daylight; brighter in evening. Better for movement. • Better at sea shore; lying on stomach; • Production of growths; tumors, cysts, warts, polyps, condylomata 	<ul style="list-style-type: none"> • Necrotic, destructive, aggressive, dullness, emptiness, violence, hatred, rancor, unveiled terror. Superstitions. Rude, ill-mannered. • Perversion, degeneration, aversion; silence, secrecy, isolation, not connected. • Hot, passionate, fiery; jealousy, resentment. • Depression, suicidal, homicidal. • Aversion to consolation. • Fear of attack; death. Blood. Thinks of death with “salivation.” Killing, knives, danger, surrounded by enemies. • All is lost; it is too late. Nothing matters anymore. Short-term memory failure. • Worse at night. “Insupportable pain.” • Bone pain, offensive discharges • Destructive addictions, dulled senses, hidden destruction. • Corrosion, cracks, grayish or bloody discharges, deformity, asymmetry, necrotic tissues.

Table 1: Summary of the Miasms

A thorough understanding of the miasms will provide a solid back-drop on which a homeopath can lay the patient’s overall picture. As both Ortega and Kent suggest in the quotes below, understanding the origins of chronic disease and then relating to the inherent constitutionality of a patient can help a homeopath more fully grasp the presenting symptoms within the context of miasmatic influence, and thus flesh out the entire picture of a patient’s chronic disease.

“To anyone who wants to be a true homeopath the enormous utility, and even indispensability, of knowledge of the miasmatic in every human, especially the sick, is self-evident.” (Dr. Proceso S. Ortega)

“He who sees not in Bright’s Disease the deep Miasm back of it, sees not the whole disease, but only the finishing of a long course of symptoms which have been developing for years.” (Aphorism 181, J. T. Kent)

Miasmatic knowledge can enable the selection of a more appropriate remedy for a patient, particularly when several appear to be on target, for it may permit even the smallest subtleties to come to the surface during differential analysis (as an example, the patient who checks his appearance several times and straightens his hair while gazing into the mirror-like finish of the elevator walls is clearly demonstrating the presence of the sycotic miasm, while the one who averts his gaze out of shyness is more psoric, and the one who snarls, “Whaddya lookin’ at?” is obviously a bit more syphilitic in nature.).

In fact, homeopathic treatment can be suppressive rather than curative if the homeopath does not keep a clear picture of the most active miasmatic state in view – prescribing a psoric remedy for a person who is predominantly demonstrating psychotic or even syphilitic symptoms may result in further suppression, making the case even more complicated.

“We need only to know the symptoms of the miasms to be able to classify the symptoms of the remedies. In simple terms, we can begin to classify most symptoms by what is too little (psoric), too much (sycotic), or destructive (syphilitic).” (Henny Heudens-Mast)

Miasms in Remedies

While remedies are generally comprised of symptoms from all the miasms (sometimes including tubercular, cancer, and aids), I've placed the remedies below in the miasmatic category that most closely fits their overall remedy picture:

Psoric (There are 222 remedies listed in “Generals, Psora” in the Synthesis. Psorinum and Sulph are the only remedies in bold type)

- Calc Carb (Italic for Psora, Italic for Sycosis, only other Calc compounds in Syphilis)
Under functioning, inability to assimilate, softness and flabbiness, bland discharges, shy, ultra-sensitive and anxious, strong family focus, cold. (Listed in over 60 “Anxiety” rubrics and over 100 ‘fear’ rubrics).
- Nux Vomica (Plain for Psora, Sycosis, and Syphilis)
Irritable, itchy eruptions; anxious, hard working. I think this remedy should really be more like italic or maybe even bold for all three!

Sycotic (There are 185 remedies listed in “Generals, Sycosis” in the Synthesis, of which 9 are bold type).

- Thuja (Bold for Sycosis, Plain for Psora, Italic for Syphilis)
The “polychrest of polychrests” for hiding, curative in gonorrhoea; fishy smells, discharges.
- Sepia (Bold for Sycosis, Italic for Syphilis)
Camouflage, abdomen distended, discharges, strong polarities, ‘speedy’ and lively. Craving for sour, acid foods.

Syphilitic (There are 182 remedies listed in “Generals, Syphilis” in the synthesis, of which 16 are bold type. Mercury and Aurum and their compounds predominate.)

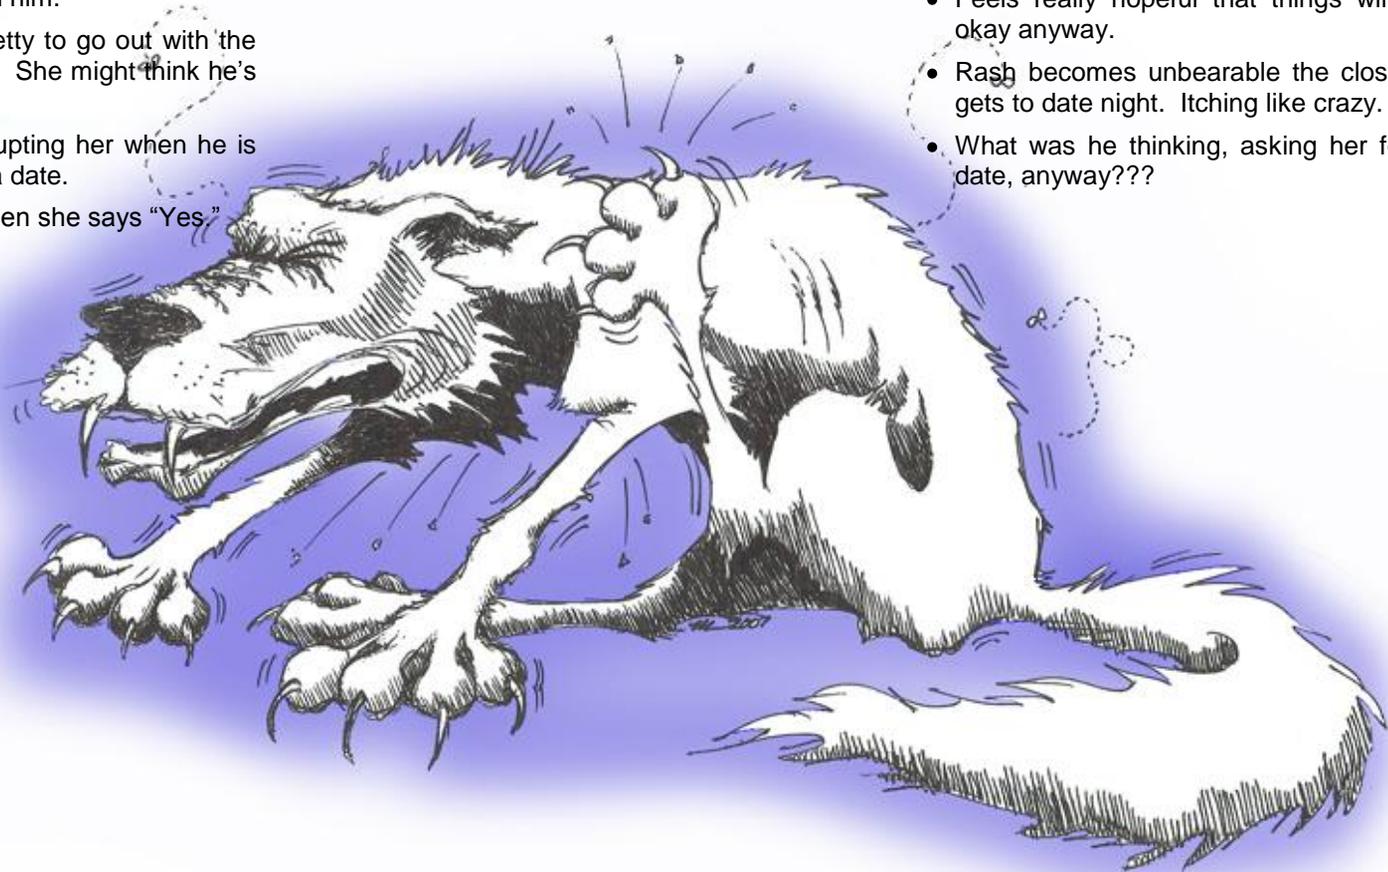

- Aurum Metallicum (Plain for Psora, plain for Sycosis, Bold for Syphilis)
Destructive, violent, degenerative; failure of heart and eyes; suicidal, depressed, dark.
- Mercurius (Italic for Psora, plain for sycosis, Bold for Syphilis)
Necrotic, wasting of tissues; curative of syphilitic cases.

The Life and Times of Mr. Psora – the Big, Bad Wolf as Timid Suitor

- May not even ask Little Red Riding Hood to go out on a date...will wait, hoping that she will ask him instead.
- Will dream about dating little Red Riding Hood for months before finally asking her.
- Worries that she won't like him.
- May ask his best friend to ask her best friend to see if she might have some interest in a date with him.
- Thinks she is too pretty to go out with the likes of him, anyway. She might think he's just a big, bad wolf.
- Apologizes for interrupting her when he is about to ask her for a date.
- Anxiety increases when she says "Yes."

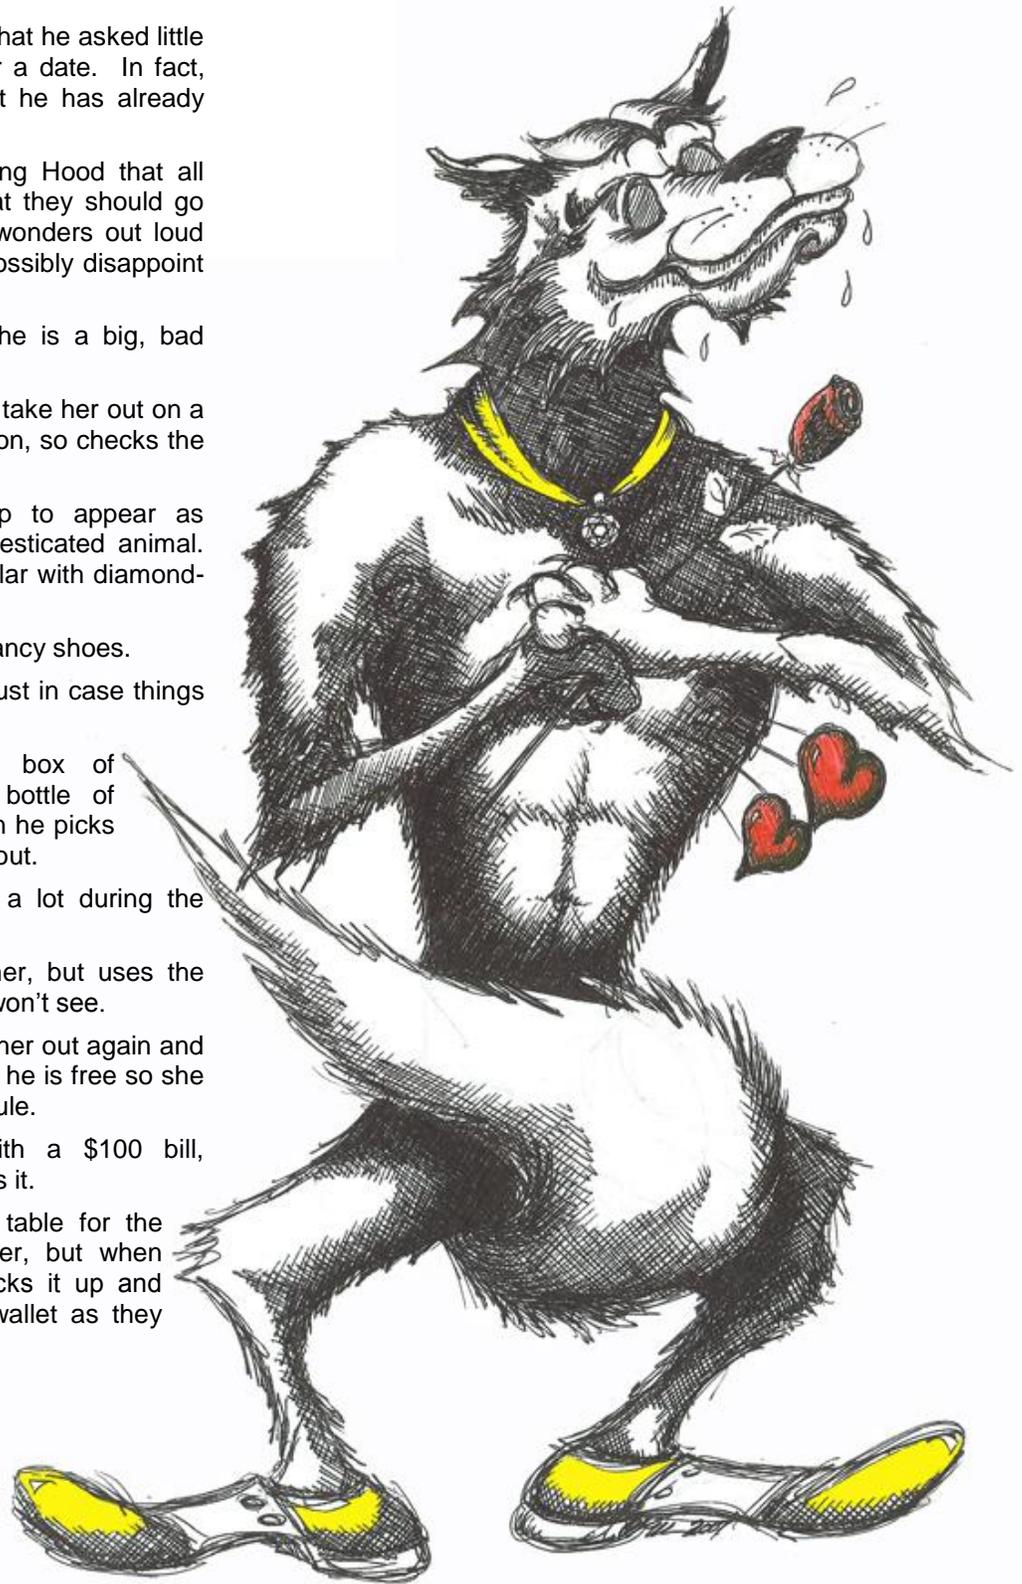

Psoric Miasm

- Wants to cancel the date because he worries that he won't know what to say or how to act. Tires thinking about it and needs a nap.
- Dreams that they fall in love and live happily ever after.
- Breaks out in a rash at the thought of getting married so soon.
- Feels really hopeful that things will be okay anyway.
- Rash becomes unbearable the closer it gets to date night. Itching like crazy.
- What was he thinking, asking her for a date, anyway???

The Life and Times of Mr. Sycosis – the Big, Bad Wolf as Enticing Suitor

- Tells all his buddies that he asked little Red Riding Hood for a date. In fact, tells his buddies that he has already had her.
- Tells Little Red Riding Hood that all his buddies think that they should go out on a date, and wonders out loud whether she could possibly disappoint so many people.
- Hides the fact that he is a big, bad wolf.
- Knows better than to take her out on a date during a full moon, so checks the calendar first.
- Gets all gussied up to appear as though he is a domesticated animal. Puts on his finest collar with diamond-studded tags.
- Wears spats on his fancy shoes.
- Rents a hotel room just in case things go really well.
- Brings a rose, a box of chocolates, and a bottle of perfume for her when he picks her up for their night out.
- Talks about himself a lot during the date; boasts.
- Drools over his dinner, but uses the napkin often so she won't see.
- Makes plans to take her out again and tells her which nights he is free so she can adjust her schedule.
- Pays for dinner with a \$100 bill, making sure she sees it.
- Leaves \$20 on the table for the waiter to impress her, but when she isn't looking, picks it up and puts it back in his wallet as they leave.

The Life and Times of Mr. Syphilis – the Big, Bad Wolf as Stalking Suitor

- Tells no one he is going to date Little Red Riding Hood, because he thinks people should just mind their own business. Wants Little Red Riding Hood all to himself (forever).
- Asks her to meet him in the park just after the sun sets.
- Surprises her by jumping out of the bushes; scares her so badly she almost cries. He laughs and tells her not to be such a fraidy-cat.
- Beats up another wolf who he says looked cross-eyed at her.

- On the first date, dares her to go steady with him. He says, "C'mon, what do you have to lose?"

- When she hesitates, he wants to know where her "sense of adventure" has gone off to.

- Orders his steak extra rare. Says he likes raw meat once in a while. Stabs it to see if it is juicy enough. Watches fascinated as it bleeds into his potatoes.

- Fights with the waiter over the bill and refuses to pay it. Later lets the air out of the waiter's tires in the parking lot. Thinks "a good tip" is for the waiter not to mess with him.

- After dinner, takes Little Red Riding Hood on a long walk in the darkest areas of the park. Wants to score.

- Becomes really mad at her when she doesn't want to "do it" on the first date. Says she should loosen up. Eventually has his way with her.

- Never calls her back.
