

## Syphilinum – the Destruction of the Disease and its Manifestation in Society

**Figure 1: Scientific Classification and Image of Treponema Pallidum.**

Generally acquired through sexual contact with an individual hosting the spirochete bacteria, *Treponema Pallidum*, syphilis is catalogued as a disease with four distinct progressive stages (primary, secondary, latent, and tertiary.). Prior to modern technology, the disease was known as *The Great Imitator* due to the fact that it's many tertiary symptoms made it difficult to readily identify, and it is argued that historical cases of leprosy epidemics were more likely syphilitic outbreaks.<sup>1</sup> Coined 'syphilis' in 1530 by Italian physician and poet Girolamo Fracastoro, the disease was epically identified as punishment sent by Apollo against a shepherd named Syphilus as a result of his defiance against Apollo<sup>2</sup>.

Primary syphilis manifests as a usually painless chancre forming within 10 – 90 days of contact with the spirochete and unless the chancre is in a visible location it may well go unnoticed. There may be local swelling of lymph nodes. The chancre resolves itself within 4 to 6 weeks and the disease moves to the secondary stage within 1 to 6 months. Involving a likewise painless reddish-pink or coppery colored rash/lesions that may cover the whole body but particularly on the palms of the hands and soles of feet, this stage is considered the most contagious and can be accompanied by mild fever, sore throat, general malaise, weight loss, meningeal headaches, arthritic complaints, and enlarged lymph nodes (see images Appendix A). More severe cases can involve acute meningitis, hepatitis, renal disease, gastritis, disorders of the rectum and colon, and several kinds of eye disorders which can eventually lead to blindness. Latent syphilis is defined as having proof of infection (by blood test) without symptoms and is sub-categorized as either early-latent (under two years since infection without symptoms) or late-latent (over two-years since infection without symptoms). Syphilis is conventionally treated using antibiotics, but it is important to note that this suppressive measure only places the patient in a state of latency, not of cure – a patient is still considered to be infectious in this stage. Tertiary syphilis generally develops within 1 to 10 years after initial infection, but may take as long as 50 years and is characterized by the formation of gummas, a non-cancerous

**Figure 2: Fifteenth century medical illustration assigning astrological causes to the disease.**

<sup>1</sup> An excellent article on the origins, history, and treatment of syphilis can be found online at Wikipedia (<http://en.wikipedia.org/wiki/syphilis>). See also the related article on the bacteria *Treponema Pallidum* ([http://en.wikipedia.org/wiki/Treponema\\_pallidum](http://en.wikipedia.org/wiki/Treponema_pallidum)).

<sup>2</sup> Apollo, the god of light and the sun, truth and prophecy, was also noted for being the bringer of medicine and healing as well as the caretaker of music, art, and poetry. It is interesting that he is credited with sending this 'mother of all diseases' to punish those in defiance. A general symptom of syphilis is loss of eyesight, and an intriguing specific symptom of neurosyphilis is Argyll Robertson pupil, a failure of the pupils to accommodate to light when they will accommodate to focus on a near object ([http://en.wikipedia.org/wiki/Argyll-Robertson\\_pupil](http://en.wikipedia.org/wiki/Argyll-Robertson_pupil) and [http://content.lib.utah.edu/cdm4/item\\_viewer.php?CISOROOT=/EHSL-Moran-Neuro-ophth&CISOPTR=60](http://content.lib.utah.edu/cdm4/item_viewer.php?CISOROOT=/EHSL-Moran-Neuro-ophth&CISOPTR=60)).

form of granuloma, most commonly found in the liver (*gumma hepatis*), but can also be found in brain, heart, skin, bone, testis, and other tissues, leading to a variety of problems. The area of the gumma eventually fails due to coagulative necrosis, or cell death, related to lack of oxygen delivery to the area due to long-term inflammation.

When viewing photos of the disease stages, one finds it hard to believe that most are actually painless, as the appearance evokes (for me, at least) a sense that it should be excruciatingly painful, suggesting a strong hint for the miasm's characteristic withdrawal and lack of emotion, as though one has been totally desensitized (GENERALALS, Reaction, lack of). Indeed, of the 388 rubrics in Kent's repertory, only 13 of them are bold type. Shroyen's Synthesis Treasure Edition shows only 35 bold-type rubrics out of a total of 1585, and it is no surprise to find that the 'boldest' rubric for Syphilinum, rated 4 in degrees is **MIND**, **Disgust**, a rubric that pretty much sums up the influence of the syphilitic miasm in present-day society.

Looking to the bold remedy symptoms of syphilinum in Kent's<sup>3</sup>, we can see the destructive tendency of this disease physically and mentally manifesting itself, primarily in the bones (head, face, and legs), through eruptions, ulcerations and abscesses, and pains in the body. What the mind lacks in expression and reaction, the body seems to counter with major expressions of severe pain, particularly in agonizing (described as unsupportable) bone pains.

Sorting the whole set of rubrics by similarity gives these major groupings:

- Insanity
- Paralysis (incl. paralysis of the mind and emotion)
- Tissue Changes (tumors, growths)
- Eruptions, Ulcers, Abscesses
- Discharges
- Heat / Cold and Inflammation
- Itching/Twitching
- Pains of the Body (esp. head, face, eyes, teeth, back, and extremities)
- Cough and Expectoration

Interestingly, with all the eruptive discharges, the body seems no longer able to discharge normally: there is prolapse, fissure, and constriction of the rectum as well as a morbid urge to urinate with only the ability for a feeble stream; blocks of the nose, and oppression of the chest with dry, hard, non-productive cough.

Numbness in the extremities is paired with a kind of 'numbness' in the mouth (lack of ability to taste) and an equal numbness of the mind (confusion and weakness of memory.).

Kent indicates this is not the best remedy for the primary symptoms of the disease itself, but is more appropriate to restore order to the vitality of one who suffers in the latent stages or for patients who are 'syphilized invalids', and states it is by no means only for those who have had the disease, but for those "with symptoms like those of the proving" or "with similar symptoms to those that are common to the disease." He indicates its use in high potencies only.

In considering how the syphilitic influence manifests in society today, one can borrow easily from the rubrics of the mind and generals. Wherever it is that disgust, rot, insanity, apathy, blood-lust, confusion, disregard for life and other 'paralyzed' reactions reign, we will find syphilis at its roots: violence, aggression, mayhem, destruction, terrorism – all are syphilitic.

---

<sup>3</sup> See Appendix B. There are a total of 388 rubrics in Kent's for Syph, 272 (70%) of which are plain-type or first-degree rubrics.

The Syphilitic Big Bad Wolf from Unit 8, shown here with his "X-Rated" placard removed, quickly gives one the idea this is not a guy to meet for tea, to meet the parents, or to meet in a dark alley.

**Figure 3: The Syphilitic Miasm as seen in the Big, Bad, Wolf.**

Spoiling and even aching for a fight (insanity), recklessly seeking an outlet for destruction (eruptions), he is perhaps the darkest side of humanity: the murderer, the rapist, the annihilator, the terrorist, the assassin, the shooter, the bomber, the serial killer, the prejudiced, the indifferent, the apathetic, the pyromaniac, the kidnapper, the self-destructive, the violent, the insane, the perverse, the severely depressed, the suicidal, the homicidal, the raging, the superstitious, the obsessive, the ones who have lost or sold their souls (lack of reaction), those who hate so violently that the conscience is muted (paralysis of emotion): all will have had their brush with syphilis at some point in time in some way, whether in direct contact with the disease or by way of generational inheritance.

And leave us not forget the many compensated individuals in whom this miasm also bears influence – the butcher, the baker, the candlestick maker (ad infinitum).

Throughout history, these tendencies have manifested not only in individuals, but also in the group mindset. When 'group-think' takes on a syphilitic posture, mass-destruction can follow quickly and always violently, such as in the case of the Ku Klux Klan, the murder of Jews during WWII, the willful annihilation and exploitation of races of people, airplanes being flown into buildings, bombs dropping planes out of the sky, the shooting up of a schoolyard, the Mumbai massacre, and the list goes on. Wherever hate, terror, and fear reign covertly or overtly, our deepest inheritance, syphilis, will no doubt be the perpetrator.

## Appendix B

### Syphilinum MIND and GENERAL Rubrics, Kent

MIND - CONFUSION of mind  
MIND - FEAR - insanity,of  
MIND - FEAR - paralysis,of  
MIND - IRRITABILITY - headache,during  
MIND - MEMORY,weakness of  
MIND - MEMORY,weakness of - dates,for  
MIND - MEMORY,weakness of - names,for proper  
MIND - MISTAKES - in calculating  
MIND - RESTLESSNESS,nervousness - headache, - during  
MIND - SPEECH,babbling - slow  
MIND - WASHING always,her hands  
GENERALS - EVENING - sunset - till sunrise  
GENERALS - NIGHT - 6 p.m. to 6 a.m.

GENERALS - ABSCESSSES - recurrent  
GENERALS - ABSCESSSES - glands  
GENERALS - ASCENDING - high agg. - amel.  
GENERALS - CONVULSIONS - epileptic  
GENERALS - CONVULSIONS - menses, - after  
GENERALS - PARALYSIS agitans - one-sided  
GENERALS - REACTION,lack of  
GENERALS - STORM, - approach of a  
GENERALS - STORM, - during storm  
GENERALS - SYPHILIS  
GENERALS - WEAKNESS,ervation  
GENERALS - WEAKNESS,ervation - morning

### Syphilinum BOLD Rubrics, Kent

MIND - IRRITABILITY - headache,during  
HEAD - PAIN, - night  
HEAD - PAIN, - cutting,darting,stabbing - Occiput - night  
FACE - ERUPTIONS - pimples - nose  
FACE - ERUPTIONS - syphilitic  
MOUTH - ULCERS - syphilitic  
BACK - PAIN - evening - sunset to sunrise

BACK - PAIN - night  
EXTREMITIES - PAIN - Leg - night  
EXTREMITIES - PAIN - Leg - warmth - of bed  
EXTREMITIES - PAIN - Leg - bones  
SKIN - ERUPTIONS - syphilitic  
GENERALS - SYPHILIS

### Syphilinum SINGLE Rubrics

MIND - WASHING always,her hands  
HEAD - PAIN, - cutting,darting,stabbing - Occiput - night  
HEAD - PAIN, - lancinating - Occiput - night  
EYE - PAIN - drawing - lamplight agg.  
FACE - ERUPTIONS - rash - syphilitic  
MOUTH - TASTE, - putrid - epileptic fit,before  
TEETH - CUPPED in children  
TEETH - DWARFED  
FEMALE GENITALIA - ITCHING - morning  
RESPIRATION - DIFFICULT - midnight - after - 1 to 4 a.m.  
COUGH - MORNING - daybreak amel.  
COUGH - CHOKING sensation,fauces from,to bifurcation of bronchi  
EXPECTORATION - BALL,feels like a round,and rushes into mouth  
CHEST - PAIN - cutting (sudden sharp pain) - night

BACK - ERUPTIONS - maculae (syphilitic)  
BACK - PAIN - evening - sunset to sunrise  
BACK - PAIN - Lumbar region - urinating, - after - agg.  
EXTREMITIES - ERUPTION - Upper Limbs - elevations - spots  
EXTREMITIES - ERUPTION - Fingers - elevated spots  
EXTREMITIES - ERUPTION - Leg - elevations - spots  
EXTREMITIES - LAMENESS - Upper Limbs - raising the arm  
EXTREMITIES - PAIN - Foot - back of - extending to - toes  
EXTREMITIES - PAIN - dislocation,as if,feeling, - Toes  
EXTREMITIES - TUMORS, - Leg - tibia,osteosarcoma  
EXTREMITIES - WASHES - always washing her hands  
GENERALS - ASCENDING - high agg. - amel.  
GENERALS - CONVULSIONS - menses, - after

### Syphilinum Sorted Rubrics, KENT

#### INSANITY

MIND - CONFUSION of mind  
MIND - FEAR - insanity,of  
MIND - MEMORY,weakness of - dates,for  
MIND - MEMORY,weakness of - names,for proper  
MIND - MISTAKES - in calculating  
MIND - SPEECH,babbling - slow  
MIND - RESTLESSNESS,nervousness - headache, - during  
MIND - WASHING always,her hands

#### PARALYSIS

MIND - FEAR - paralysis,of  
EYE - PARALYSIS - optic nerve,amaurosis  
EAR - CALCAREOUS deposit on tympanum  
HEARING - IMPAIRED - Lost  
FACE - PARALYSIS  
MOUTH - PARALYSIS, - Tongue  
MOUTH - SPEECH - thick  
MOUTH - TASTE, - wanting, loss of taste  
EXTREMITIES - LAMENESS - Upper Limbs - raising the arm  
EXTREMITIES - NUMBNESS - Hand - palm

EXTREMITIES - NUMBNESS - Foot - sole of  
EXTREMITIES - CONTRACTION of muscles and tendons  
EXTREMITIES - CONTRACTION of muscles and tendons -  
Knee,hollow of  
EXTREMITIES - EXTENSION, - fingers,difficult  
EXTREMITIES - WEAKNESS - Hip  
EXTREMITIES - WEAKNESS - Knee  
GENERALS - PARALYSIS agitans - one-sided  
GENERALS - WEAKNESS,ervation<sup>4</sup>  
GENERALS - WEAKNESS,ervation - morning

#### TISSUE CHANGES

EXTREMITIES - TUMORS, - Leg - tibia,osteosarcoma  
FEMALE GENITALIA - TUMORS - Ovaries  
NOSE - PROTUBERANCES  
TEETH - LOOSENESS of - sensation  
TEETH - SERRATED

---

<sup>4</sup> Loss of vitality

HEAD - HAIR, - falling  
TEETH - CARIES, decayed, hollow - gums, at edge of  
TEETH - CUPPED in children

#### **ERUPTIONS, ULCERS, ABCESSES**

EYE - ERUPTIONS, - canthi  
EAR - ERUPTIONS - boils  
FACE - ERUPTIONS - nose  
FACE - ERUPTIONS - crusty, scabby  
FACE - ERUPTIONS - crusty, scabby - chin  
FACE - ERUPTIONS - crusty, scabby - nose  
FACE - ERUPTIONS - papular  
FACE - ERUPTIONS - pimples  
FACE - ERUPTIONS - rash - syphilitic  
FACE - ERUPTIONS - red - nose, on  
FACE - ERUPTIONS - vesicles  
CHEST - ERUPTIONS - rash  
BACK - ERUPTIONS - maculae (syphilitic)  
EXTREMITIES - ERUPTION - Upper Limbs - boils  
EXTREMITIES - ERUPTION - Upper Limbs - elevations - spots  
EXTREMITIES - ERUPTION - Fingers - elevated spots  
EXTREMITIES - EXCORIATION, - Toes, between  
SKIN - ERUPTIONS - coppery  
SKIN - ERUPTIONS - dirty  
SKIN - ERUPTIONS - rash  
NOSE - ULCERS - inside  
NOSE - ULCERS - septum, round ulcers  
MOUTH - ULCERS - base black - lardaceous  
MOUTH - ULCERS - gangrenous  
MOUTH - ULCERS - Palate - on velum  
STOMACH - ULCERS  
RECTUM - ULCERATION  
MALE GENITALIA - ULCERS - Penis - glans  
FEMALE GENITALIA - ULCERS  
RECTUM - HAEMORRHOIDS - ulcerating  
EXTREMITIES - ULCERS - Hand - back of  
EXTREMITIES - ULCERS - Lower Limbs - varicose  
EXTREMITIES - ULCERS - Thigh  
EXTREMITIES - ULCERS - Leg  
EXTREMITIES - ULCERS - Leg - burning  
SKIN - ULCERS - burning  
SKIN - ULCERS - shining  
THROAT INTERNAL - MUCOUS patches  
THROAT INTERNAL - SYPHILITIC affections  
ABDOMEN - ABSCESS in walls - Inguinal region  
RECTUM - ABSCESS  
BACK - ABSCESS - psoriasis

#### **DISCHARGES, FLUIDS**

EAR - DISCHARGES  
EAR - DISCHARGES - purulent  
NOSE - DISCHARGE, - crusts, scabs, inside  
NOSE - DISCHARGE, - greenish  
NOSE - DISCHARGE, - offensive  
NOSE - DISCHARGE, - thick  
NOSE - DISCHARGE, - yellowish-green  
EYE - TEARS, - acrid  
STOMACH - NAUSEA  
STOMACH - VOMITING - coughing, on  
EXPECTORATION - GRAYISH  
EXPECTORATION - GREENISH  
EXPECTORATION - PURULENT  
EXPECTORATION - THICK  
EXPECTORATION - WHITE  
EXPECTORATION - YELLOW  
RECTUM - DIARRHOEA - morning - bed, driving out of  
RECTUM - MOISTURE  
STOOL - ACRID, corrosive, excoriating  
FEMALE GENITALIA - LEUCORRHOEA  
FEMALE GENITALIA - LEUCORRHOEA - thick  
FEMALE GENITALIA - LEUCORRHOEA - thin, watery  
FEMALE GENITALIA - LEUCORRHOEA - white  
FEMALE GENITALIA - MENSES, - bright-red  
EXPECTORATION - BALL, feels like a round, and rushes into mouth

#### **HEAT (INFLAMMATION, SWELLING) VS COLD**

EYE - INFLAMMATION  
EYE - INFLAMMATION - iris - rheumatic  
EYE - INFLAMMATION - iris - syphilitic  
EYE - CHEMOSIS<sup>5</sup>  
EYE - CHEMOSIS - right  
EYE - HEAT in - lids  
EYE - REDNESS  
EYE - PAIN - burning, smarting, biting  
EYE - REDNESS - lids - edges of  
EYE - COLDNESS in  
EYE - COLDNESS in - cold air blew in, as if  
THROAT INTERNAL - FULLNESS  
FACE - SWELLING - submaxillary glands  
FACE - SWELLING - submaxillary glands - hard  
NOSE - PAIN in - burning, smarting  
NOSE - PAIN in - burning, smarting - wings  
EYE - SWOLLEN - lids  
EYE - SWOLLEN - lids - margins  
MOUTH - PROTRUDED, Tongue  
FEMALE GENITALIA - SWOLLEN - Ovaries  
MALE GENITALIA - SWELLING - Scrotum  
RECTUM - HAEMORRHOIDS  
RECTUM - HAEMORRHOIDS - touch agg.  
EXTREMITIES - FELON (Onychia, Paronychia, Panaritium, etc.)  
beginning in nail - run around.  
EXTREMITIES - SWELLING - Fingers - second  
EXTREMITIES - SWELLING - Toes

#### **ITCHING/TWITCHING**

FACE - TWITCHING  
EYE - TWITCHING - lids - right  
MOUTH - SPASMS, Tongue  
BACK - SPASMS  
EYE - ITCHING - canthi - inner  
NOSE - ITCHING - inside  
NOSE - ITCHING - inside - left  
RECTUM - ITCHING  
URETHRA-URINARY ORGANS - ITCHING - meatus  
FEMALE GENITALIA - ITCHING  
FEMALE GENITALIA - ITCHING - morning

#### **COLORATION**

FACE - SPOTS  
MOUTH - DISCOLORATION, - Tongue, - dirty  
MOUTH - DISCOLORATION, - Tongue, - red  
TEETH - DISCOLORED, - black  
EYE - DISCOLORATION - of iris  
EYE - DULLNESS - iris  
VISION - COLORS before the eyes - black - spots  
SKIN - DISCOLORATION, - bluish  
SKIN - DISCOLORATION, - red - spots - coppery  
SKIN - INTERTRIGO  
STOOL - YELLOW - orange

#### **PAINS IN THE BODY**

HEAD - PAIN, - sun, from exposure to  
HEAD - PAIN, - Vertex  
HEAD - PAIN, - cutting, darting, stabbing - Occiput  
HEAD - PAIN, - lancinating - Occiput  
HEAD - PAIN, - lancinating - Occiput - night  
HEAD - PAIN, - pressing - Vertex  
FACE - PAIN, - right  
FACE - PAIN, - eating, - while  
FACE - PAIN, - lying, while  
FACE - PAIN, - lying, while - on affected side agg.  
FACE - PAIN, - pressure - amel.  
EYE - PAIN - light  
EYE - PAIN - canthi - inner  
EYE - PAIN - aching  
EYE - PAIN - drawing - lamplight agg.  
EYE - PAIN - sand, as from  
EYE - PAIN - stitching - extending backward - inward  
EAR - PAIN

---

<sup>5</sup> Swelling of conjunctiva.

NOSE - PAIN in - sore,bruised,externally - inside  
TEETH - PAIN, - left  
TEETH - PAIN, - cold, - anything  
TEETH - PAIN, - masticating,from  
TEETH - PAIN, - warm - drinks,from  
TEETH - PAIN, - jerking  
RECTUM - PAIN  
RECTUM - PAIN - soreness  
RECTUM - SENSITIVE  
MALE GENITALIA - PAIN - sore,bruised  
FEMALE GENITALIA - PAIN - Ovaries  
FEMALE GENITALIA - PAIN - Ovaries - right  
FEMALE GENITALIA - PAIN - Ovaries - left - extending to abdomen - right  
FEMALE GENITALIA - PAIN - Ovaries - left - extending to abdomen - small of back  
FEMALE GENITALIA - PAIN - Ovaries - extending to - back  
FEMALE GENITALIA - PAIN - aching - Ovaries  
FEMALE GENITALIA - PAIN - aching - Ovaries - left  
FEMALE GENITALIA - PAIN - cutting - Ovaries  
FEMALE GENITALIA - PAIN - sore,tenderness - Ovaries  
FEMALE GENITALIA - PAIN - stitching - Ovaries  
KIDNEY-URINARY ORGANS - PAIN - extending - testes  
CHEST - PAIN - burning - coughing, - during  
CHEST - PAIN - cutting (sudden sharp pain) - Heart  
CHEST - PAIN - sore,bruised  
CHEST - PAIN - sore,bruised - coughing,from  
CHEST - PAIN - sore,bruised - Mammae  
BACK - HEAVINESS,weight - Lumbar region  
BACK - PAIN - Cervical region - bending head - backward - amel.  
BACK - PAIN - Dorsal region - scapulae - between  
BACK - PAIN - Lumbar region  
BACK - PAIN - Lumbar region - urinating, - during  
BACK - PAIN - Lumbar region - urinating, - after - agg.  
BACK - PAIN - Coccyx  
BACK - PAIN - Coccyx - sitting,while  
EXTREMITIES - PAIN - night  
EXTREMITIES - PAIN - Upper Limbs - raising arm  
EXTREMITIES - PAIN - Shoulder - raising the arm - agg.  
EXTREMITIES - PAIN - Upper Arm - raising arm  
EXTREMITIES - PAIN - Lower Limbs - morning - amel.  
EXTREMITIES - PAIN - Lower Limbs - menses, - before  
EXTREMITIES - PAIN - Lower Limbs - sciatica - motion - agg.  
EXTREMITIES - PAIN - Lower Limbs - sciatica - walking - amel.  
EXTREMITIES - PAIN - Lower Limbs - warmth - of bed  
EXTREMITIES - PAIN - Hip - night  
EXTREMITIES - PAIN - Thigh  
EXTREMITIES - PAIN - Thigh - standing, - while  
EXTREMITIES - PAIN - Thigh - anterior part  
EXTREMITIES - PAIN - Knee  
EXTREMITIES - PAIN - Ankle - rheumatic  
EXTREMITIES - PAIN - Foot - back of  
EXTREMITIES - PAIN - Foot - back of - rheumatic  
EXTREMITIES - PAIN - Foot - back of - extending to - toes  
EXTREMITIES - PAIN - Foot - sole - standing, - while  
EXTREMITIES - PAIN - aching - Knee  
EXTREMITIES - PAIN - aching - Leg  
EXTREMITIES - PAIN - dislocation,as if,feeling, - Toes

EXTREMITIES - PAIN - sore,bruised - Foot - sole  
EXTREMITIES - PAIN - tearing - Thigh - walking, - amel.

#### COUGH AND EXPECTORATION

LARYNX-TRACHEA - SCRAPING,clearing larynx  
LARYNX-TRACHEA - VOICE, - hoarseness - menses, - before  
RESPIRATION - ASTHMATIC - thunderstorm,during  
RESPIRATION - DIFFICULT - eating, - after  
RESPIRATION - DIFFICULT - lying, - while  
RESPIRATION - DIFFICULT - thunder storm,before  
RESPIRATION - RATTLING  
COUGH - MORNING - daybreak amel.  
COUGH - CHOKING sensation,fauces from,to bifurcation of bronchi  
COUGH - DINNER, - after  
COUGH - DRY  
COUGH - DRY - night  
COUGH - DRY - sleep, - disturbing  
COUGH - HARD  
COUGH - HARD - night  
COUGH - LYING - abdomen,on,amel.  
COUGH - LYING - side - right  
COUGH - RACKING  
COUGH - SCRAPING - larynx,from  
COUGH - SLEEP, - disturbing  
COUGH - WHOOPING  
CHEST - DRAWN feels, - toward back  
CHEST - OPPRESSION

#### MISCELLANEOUS

VISION - DIPLOPIA  
VISION - MYOPIA  
NOSE - OBSTRUCTION  
MOUTH - SALIVA, - sweet  
MOUTH - TASTE, - putrid - epileptic fit,before  
MOUTH - THICK,Tongue,sensation  
TEETH - GRINDING  
STOMACH - THIRST - extreme  
  
RECTUM - FISSURE  
RECTUM - PROLAPSUS  
RECTUM - CONSTRICTION,contraction,closure,etc  
BLADDER-URINARY ORGANS - URGING to urinate (morbid desire) - night  
BLADDER-URINARY ORGANS - URGING to urinate (morbid desire) - frequent  
BLADDER-URINARY ORGANS - URINATION, - feeble stream (slow)  
  
EXTREMITIES - EMACIATION - Upper Limbs  
EXTREMITIES - EMACIATION - Leg  
EXTREMITIES - PERSPIRATION - Wrist  
  
SLEEP - DREAMS, - disease  
SLEEP - SLEEPLESSNESS - sleepiness,with  
  
GENERALS - ASCENDING - high agg. - amel.  
GENERALS - CONVULSIONS - menses, - after  
GENERALS - STORM, - approach of a  
GENERALS - STORM, - during storm
